

SILA Alkalis

Liquid laundry detergent.

SILA Alkalis – a liquid, non-foaming laundry detergent. **SILA Alkalis**, when used together with **BS Peroksi 35** or **BS Peroksi 50** bleach, forms a washing system designed for laundering textiles in hospitals, hotels, nursing homes and other healthcare facilities.

SILA Alkalis:

- binds dirt particles during washing and prevents them from being absorbed into the fabric;
- contains additives that help prevent fabrics from greying;
- is particularly effective at removing food (protein) and grease stains, for example, from tablecloths and kitchen laundry;
- ensures excellent washing results.

Product composition

Submitted in safety data sheet.

Instructions for use

The dosage depends on the laundry equipment and the level of soiling. **SILA Alkalis** dosage is 5–20 ml/kg of dry laundry.

Information for safe use

Wear protective gloves / protective clothing / eye (face) protection. Keep in a tightly closed original container in a dry, well-ventilated area. Keep away from acids, flammable substances, oxidizing substances (fire hazard) and metals. Keep containers tightly closed. Do not damage the packaging. Store at a temperature not below –10 °C and not above +35 °C, away from heat sources and direct sunlight. Do not mix with other products used for laundry.

Concentration determination methodology

Submitted separately.

Physical and chemical properties

Physical state	Liquid
Color	Clear, colorless
Odor	Characteristic
pH, 1 %, 20 – 25 °C	12,0 – 13,0
pH, 100 %, 20 – 25 °C	~14
Relative density, g/cm ³ , 20 – 25 °C	1,32 – 1,35
